

Student Feedback Management

Story Title:

Create a “*Student Feedback*” application where students can submit feedback for their courses, and teachers can view the feedback.

Create a New Table

- **Label:** Student Feedback

Create an application and modules

- New feedback - navigate to create form
- All feedbacks – all records
- My feedbacks – submitted by me

Fields

Feedback Number	Auto number		Format- ST0000100
Student Name	Reference(sys_user)	Mandatory	
Department	choice		CS, B. Com, BBA
Course Name	Choice	Mandatory	
Feedback Text	String (multi line)	mandatory	
Rating	choice		Excellent, good, average, poor
Submitted Date	Date/time	mandatory	
Teacher Comments	Journal entry		Comments should show in activity formatter

Create Roles

- Student
- Teacher
- admin

Create Users

- create at least 3 student users
- 3 for teachers
- 1 admin

Choice creation

- CS- python, java, php, c#
- B.com – computer application, finance, economics
- BBA- business studies, business management

UI Policies

- Show and make Course Name mandatory when Department is selected

Client Script

- Only students can create feedback. If a teacher/admin opens the form, show an error and make the form read-only.
- Onload show field message for feedback field “please provide your valuable feedback”.

Note: Every modification should be captured in the update sets
